DISPATCHES ON FILE  
 0

**Inventory status**  
 No inventory record for SKU 'STEAM kit set'. The dispatch decrement will fail until an admin adds it via [admin/inventory](#).

**Existing dispatches**  
 No dispatches raised yet.

**Raise direct dispatch**

**Commented [MM1]: Finding-** For Ops, it is not mandatory to have an active MOU. Once we receive approval from Sales, we proceed with the dispatch of kits and materials.  
**Below are the data points to be added-** please ensure this page includes the following details: Trainer assigned, number of students, location, and grade-wise student count.

### Laxmipat Singhania Academy PI

**MOU-STEAM-2627-032**  
 Generate proforma invoice for the next pending instalment.

SCHOOL  
 Laxmipat Singhania Academy

GSTIN  
 To be added

PROGRAMME  
 STEAM

PENDING INSTALMENTS  
 0

School GSTIN is not on file. The PI document will render "To be added" for the GSTIN field. Finance can backfill via [schools/SCH-LAXMIPAT\\_SINGHANIA\\_A](#) edit before GST filing if needed.

**Instalment**  
 No pending instalments

Generate PI Cancel

Please select an item in the list.

**Commented [MM2]: Finding-** Ops is not authorized for generating the PI.  
**Data Point-** it should not be visible to the Ops/Implementation team. Please remove it.

**Raise direct dispatch**  
 For the standard programme kit set, raise a Dispatch directly. Multi-SKU / per-grade requests should flow through [dispatch/request](#). Auto-derives line items from the MOU programme.

**Instalment number**  
 Instalment 1 of 2

Raise dispatch Cancel

**Commented [MM3]: Requirement-** Dispatch for Kits should contain a table with below fields.

| School Name | Address    | SPOC Name     | Contact Number | Grade 1 | Grade 2 | Grade 3 | Grade 4 | Grade 5 | Grade 6 | Grade 7 | Grade 8 | Grade 9 | Grade 10 | Rechargeable Batteries |
|-------------|------------|---------------|----------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|----------|------------------------|
| LSA         | KOLKATA WB | Mr. MK BANSAL | 9456838281     | 17      | 21      | 20      | 15      | 24      | 25      | 26      | 25      | 0       | 0        | 25                     |

**Data Points-** Under All Programmes the product wise filter to be added.

**Commented [MM7]:** Findings-Sales and view Pipeline to be removed.

## AI Platform – Workflow Gaps, Observations & Suggested Process Flow

### Objective

To create a seamless workflow between Sales, Operations, and Finance teams through the AI-based platform by ensuring proper visibility, notifications, status tracking, escalations, and accountability at every stage.

### 1. Current Expected Workflow (Ideal Flow)

#### Step 1 – MOU Upload by Sales

- Sales team uploads the signed MOU into the system.
- System should automatically capture:
  - School Name
  - Branch/Location
  - Contact Person Details
  - Number of Students
  - Commercials/Fees
  - Payment Cycle
  - Program Type
  - Start Date
  - Duration
  - Billing Details

Visibility:

Captured details should automatically become visible to:

- Operations Team
- Finance Team

#### Step 2 – MOU Activation & Validation

- Sales updates MOU status:
  - Pipeline
  - Active
  - Inactive
- Once marked Active:
  - Finance team should receive automatic notification.
  - Accounts/Billing process should begin.

#### Step 3 – Payment Verification by Finance

- Finance checks:
  - Payment cycle
  - Invoice schedule
  - First installment/payment status

- Once first installment/payment is received:
  - Finance notifies Operations through system notification.

Missing Flow Identified:

Currently there is no structured workflow between Sales and Finance for payment confirmation and status visibility.

#### **Step 4 – Dispatch Request by Operations**

- After payment confirmation:
  - Operations raises dispatch request to Finance.

Dispatch Request Should Include:

- School details
- Required kits/items
- Quantity
- Delivery address
- Dispatch priority
- Expected delivery timeline

#### **Step 5 – PI Generation by Finance**

- Finance generates PI (Proforma Invoice/Purchase Initiation).

Notification Requirement:

Once PI is generated:

- Notification should be visible to:
  - Sales Team
  - Operations Team

Current Gap:

PI updates are not centrally visible across departments.

#### **Step 6 – Shipment & Tracking**

- Shipment tracking details should be updated in the system.

Tracking Visibility:

Tracking details must be visible on:

- Sales Dashboard
- Operations Dashboard
- Finance Dashboard

Suggested Tracking Statuses:

- Dispatch Requested

- PI Generated
- Packed
- Shipped
- In Transit
- Delivered

### Step 7 – Delivery Confirmation

- Once order is delivered at school:
  - Operations updates delivery status in system.

Final Notification:

Delivery completion notification should be sent to:

- Sales Team
- Finance Team

## 2. Major Workflow Gaps Identified

### A. No Proper Sales → Finance Workflow

Issue:

No clear communication or automated transition exists between Sales and Finance after MOU activation.

Recommendation:

- Automated notification workflow required.
- Finance dashboard should show:
  - Newly activated MOUs
  - Pending payment confirmations
  - Billing cycle alerts

### B. Lack of Centralized Status Visibility

Issue:

Different departments do not have unified status tracking.

Recommendation:

Single status tracker visible to all teams.

Suggested Master Status Flow:

- Pipeline
- MOU Uploaded
- Active
- Payment Pending
- 1st Installment Received
- Dispatch Requested

- PI Generated
- Shipment In Progress
- Delivered
- Closed

### C. No Audit Tracking

Issue:

Changes made in student count or school details are not traceable.

Recommendation:

Enable audit logs for:

- Number of students edited
- Fee changes
- MOU modifications
- Status changes

Audit Log Should Capture:

- Old value
- New value
- Edited by
- Timestamp

### D. Lack of Escalation Workflow

Recommendation:

Dedicated escalation module required.

Escalation Ownership:

Sales Team can raise escalation for:

- Dispatch delays
- Delivery delays
- Shipment issues

Finance Team can raise escalation for:

- Payment delays
- Invoice disputes
- Billing issues

## 3. Dashboard Recommendations

### Sales Dashboard

Required Features:

- MOU Upload
- Auto data capture from MOU

- School database
- Pipeline tracking
- Active/Inactive status
- Escalation tab
- Email notifications
- Dispatch visibility
- Payment visibility

Additional Suggestion:

Editable student count with audit logs.

### Operations Dashboard

Required Features:

- Access to active schools
- Payment confirmation visibility
- Dispatch request module
- Shipment tracking
- Delivery status updates
- Escalation monitoring

### Finance Dashboard

Required Features:

- Active MOU visibility
- Payment cycle tracker
- Invoice management
- PI generation module
- Inventory updates
- Shipment coordination
- Notifications to Ops & Sales

## 4. Inventory Management Suggestions

Current Gap:

Inventory updates are not communicated properly across departments.

Recommendation:

Finance inventory updates should automatically notify:

- Operations Team
- Sales Team

Suggested Inventory Statuses:

- In Stock
- Reserved
- Low Stock

- Out of Stock
- Dispatched

## 5. Notification System Recommendations

Automated Notifications Required:

| Trigger                 | Notify                |
|-------------------------|-----------------------|
| MOU Uploaded            | Ops + Finance         |
| MOU Activated           | Finance               |
| Payment Received        | Operations            |
| Dispatch Request Raised | Finance               |
| PI Generated            | Sales + Ops           |
| Shipment Dispatched     | Sales + Ops + Finance |
| Delivered               | Sales + Finance       |
| Escalation Raised       | Concerned Department  |

## 6. Suggested Modules to be Added

Core Modules:

- MOU Management
- School Database
- Payment Tracking
- Dispatch Management
- Shipment Tracking
- Escalation Management
- Audit Logs
- Notification Center
- Inventory Management

## 7. Final Recommendation

The platform should function as a single centralized workflow system where:

- Sales initiates the process
- Finance validates payment and inventory
- Operations executes dispatch and delivery
- All teams have real-time visibility
- Automated notifications reduce manual follow-ups

- Audit logs maintain accountability
- Escalation workflows ensure faster resolution

This will significantly reduce:

- Communication gaps
- Manual dependency
- Delays in dispatch
- Missed payment tracking
- Cross-department confusion

And improve:

- Transparency
- Operational efficiency
- Accountability
- Reporting accuracy
- Turnaround time (TAT) tracking
